EXPERIENCE

Founding Engineer & Tech Lead, Movigo Innovations Pvt. Ltd., Indore Apr 2026 – present

App Developer (Apr 2026), Lead App Developer (May 2026), Founding Engineer & Tech Lead (Jun 2026)

- Only engineer at a live delivery marketplace: rebuilt the product from scratch after an outsourced team delivered designs but no working software, and own the backend, both mobile apps, the operations console and production support.
- Node.js, Express and MongoDB backend with 400+ API routes, 40 data models, 8 scheduled jobs and a 15-second real-time dispatch loop.
- Moved pricing, zones, surge multipliers and dispatch radius into cached server-side settings: operations change prices without an app release, and pricing reads fall from 100+ per second to none within 60 seconds.
- Shipped Flutter driver and retailer apps to Google Play (1K+ installs each) and the retailer app to the App Store.
