EXPERIENCE

Founding Engineer & Tech Lead, Movigo Innovations Pvt. Ltd., Indore Apr 2026 – present

App Developer (Apr 2026), Lead App Developer (May 2026), Founding Engineer & Tech Lead (Jun 2026)

- Only engineer at a live delivery marketplace: rebuilt the product from scratch after an outsourced team delivered designs but no working software, and own the backend, both mobile apps, the operations console and production support.
- Node.js, Express and MongoDB backend with 400+ API routes, 40 data models, 8 scheduled jobs and a 15-second real-time dispatch loop.
- Switched dispatch to OSRM road distances with one distance-matrix call per booking instead of one call per driver.
- Shipped Flutter driver and retailer apps to Google Play (1K+ installs each) and the retailer app to the App Store.

PROJECTS

CricXAI Python, LightGBM, SHAP, FastAPI, Parquet, Docker, GitHub Actions github.com/Mokshitsharma/CricXAI

- Recommends what to bowl next in an ODI, with dismissal probability, dismissal type, expected runs and SHAP reasons, trained on 1.36 million real deliveries.
- Leakage-safe features, match-grouped cross-validation and isotonic calibration: dismissal ROC-AUC 0.749, runs MAE 0.867; versioned models served through FastAPI.
- Parquet store about 15× smaller and 10× faster to load than CSV; 71 pytest tests with CI on GitHub Actions.

Sensei AI Python, PyTorch, Stable-Baselines3, hmmlearn, SHAP, FinBERT, FastAPI, Next.js github.com/Mokshitsharma/Sensei

- Buy, sell or hold signals for Nifty 50 stocks from five model families (random forest, LSTM, temporal CNN, PPO agent, hidden Markov regime model) combined in a readable vote with SHAP and FinBERT news sentiment.
- Backtester reports returns, Sharpe ratio and maximum drawdown; caching loaded models cut a cold analysis from about 31 s to about 7 s.

Customer churn with explainable AI Python, XGBoost, SHAP, Streamlit github.com/Mokshitsharma/Customer_Churn_using_XAI

- Predicts which customers will leave with XGBoost and explains each prediction in plain English, with a retention suggestion, using SHAP; Streamlit dashboard for non-technical users.

AI Business Analytics Python, scikit-learn, SHAP, Gemini, FastAPI, Streamlit, ReportLab github.com/Mokshitsharma/ai-business-analytics

- Upload a CSV and get cleaning, exploratory analysis, automatically trained models, SHAP explanations and an LLM-written HTML and PDF report.
- One pipeline behind a CLI, a FastAPI service with background jobs and a Streamlit app; SHAP cost bounded by a 100-row sample; the report still ships if the LLM is unavailable.

Credit card default prediction Python, scikit-learn, XGBoost github.com/Mokshitsharma/Credit-Card-Default

- Default prediction on 30,000 UCI credit-card clients comparing logistic regression, random forest and XGBoost: about 81% accuracy, ROC-AUC 0.72 to 0.76.
