Mokshit Sharma

Full-Stack Developer

Indore, India | mokshitsharmalaptop@gmail.com | mokshitsharma27.vercel.app | github.com/Mokshitsharma | linkedin.com/in/mokshit-sharma-75b5ab305

Available for internships and full-time roles, remote, hybrid or on-site in India.

SUMMARY

Full-stack developer running the entire product of a live delivery marketplace as its only engineer: Node.js backend, Flutter apps on Google Play and the App Store, and the operations console, with a focus on money and concurrency done right.

SKILLS

Backend	Node.js, Express, Python, FastAPI, TypeScript, real-time dispatch, Pusher and Socket.io, Razorpay and PayPal payments, ledgers and idempotency, scheduled jobs
Frontend and mobile	Flutter (Play Store and App Store releases), React, Next.js, React Native (Expo), Tailwind CSS
Databases	MongoDB (geospatial), PostgreSQL (Prisma, Drizzle), Supabase, MariaDB, SQLite, Chroma, Redis
Delivery	Docker, GitHub Actions, Codemagic, Vercel, pytest, Vitest, JUnit, Playwright
Languages	Python, TypeScript, JavaScript, Dart, SQL, Java, C++, R

EXPERIENCE

Founding Engineer & Tech Lead, Movigo Innovations Pvt. Ltd., Indore Apr 2026 – present

App Developer (Apr 2026), Lead App Developer (May 2026), Founding Engineer & Tech Lead (Jun 2026)

- Only engineer at a live delivery marketplace: rebuilt the product from scratch after an outsourced team delivered designs but no working software, and own the backend, both mobile apps, the operations console and production support.
- Node.js, Express and MongoDB backend with 400+ API routes, 40 data models, 8 scheduled jobs and a 15-second real-time dispatch loop.
- Made booking acceptance race-safe: one conditional database write lets exactly one of several accepting drivers win a booking.
- Shipped Flutter driver and retailer apps to Google Play (1K+ installs each) and the retailer app to the App Store.
- Moved pricing, zones, surge multipliers and dispatch radius into cached server-side settings: operations change prices without an app release, and pricing reads fall from 100+ per second to none within 60 seconds.
- Integrated Razorpay wallets and fees so every payment is verified and credited exactly once; moved live tracking and chat to Pusher without breaking apps already in users' hands.
- Built FieldOps, a workforce platform for a ~20-person field team: GPS attendance from an Android foreground service uploaded in one batch a minute, onboarding, call logs and a points engine with weights stored in the database.

Internships

- **AI/ML Intern and Python Development Intern (virtual)**, CODEXINTERN Aug 2025
- **Software Development Engineer Intern (part-time, remote)**, Bluestock Fintech May – Jun 2025
- **C and C++ Programming Intern**, TechnoHacks Solutions Pvt. Ltd. Nov – Dec 2024
- **C++ Programming Intern (virtual)**, CodSoft Nov – Dec 2024

Plus 7 further internships in data science, analytics and AI; full list at mokshitsharma27.vercel.app/experience.

PROJECTS

Refera React Native (Expo), React, Express 5, Prisma, PostgreSQL, TypeScript github.com/Mokshitsharma/Banksaathi-clone

- Fintech referral platform: converted leads pay two-tier commissions into an append-only ledger where a database trigger rejects updates and deletes and balances can never go negative.
- Money in integer paise and rates in basis points; row locks make simultaneous withdrawals safe; mobile app, admin panel and API in one typed monorepo with 50 API tests.

Hyperlocal Marketplace Node.js, Express, PostgreSQL, Drizzle, Socket.io, Next.js, TypeScript

- Delivery marketplace with a customer web app, store dashboard and operations API: every order transition is a compare-and-set update, stock is reserved atomically, and in-flight orders are reconciled on restart.
- 52 of 52 backend tests passing, covering the state machine, checkout and payments, dispatch retry and escalation, and restart recovery.

Dairy Collection Manager React, Vite, Supabase, PostgreSQL, Vercel — Live · milk-management-five.vercel.app

- Daily milk register for a collection centre: fat-based rate interpolation, supplier ledgers, advances repaid oldest-first and period settlements in one reversible database transaction.

SettleAI Next.js, TypeScript, PostgreSQL, Drizzle, MCP, PayPal APIs, Zod, Playwright — PayPal AI Hackathon 2026 entry

- Escrow for real-world jobs that AI agents hire people to do: agents scope jobs, judge photo proof and propose dispute splits, and a deterministic guard approves every payout.
- Double-entry ledger in integer cents with idempotency keys; every step becomes a signed, hash-linked receipt that verifies offline in 81 ms.
- 146 unit, integration and end-to-end tests; evaluation shows 0% false releases and every injected or tampered proof detected, and a 50-way concurrency test never overspends.

EDUCATION

Integrated B.Tech + M.Tech, Artificial Intelligence and Data Science, CGPA 8.2 — 2023 – 2028 (expected)
School of Data Science and Forecasting, Devi Ahilya Vishwavidyalaya, Indore

CERTIFICATIONS

Google Data Analytics Professional Certificate; HackerRank 5-star in Python, SQL and C++; Data Analyst Program, Infosys Springboard; 5-Day AI Agents Intensive, Kaggle and Google (Dec 2025); Generative AI Foundations, Skillsoft (Nov 2025); Generative AI Foundations: IT Integration with Generative AI, Infosys Springboard (Nov 2024); Excel, Infosys Springboard (Nov 2024); AI Masterclass, Freedom of AI (Jan 2024).
