Mokshit Sharma

Software Engineer

Indore, India | mokshitsharmalaptop@gmail.com | mokshitsharma27.vercel.app | github.com/Mokshitsharma | linkedin.com/in/mokshit-sharma-75b5ab305

Available for internships and full-time roles, remote, hybrid or on-site in India.

SUMMARY

Software engineer with production ownership of a live delivery marketplace as its only engineer, and a habit of building the hard parts from first principles: race-safe state machines, append-only ledgers and hand-written data structures.

SKILLS

Backend	Node.js, Express, Python, FastAPI, TypeScript, real-time dispatch, Pusher and Socket.io, Razorpay and PayPal payments, ledgers and idempotency, scheduled jobs
Algorithms	Java, hand-built hash map, heap and k-d tree, Dijkstra, A*, 2-opt, C and C++
Databases	MongoDB (geospatial), PostgreSQL (Prisma, Drizzle), Supabase, MariaDB, SQLite, Chroma, Redis
Frontend and mobile	Flutter (Play Store and App Store releases), React, Next.js, React Native (Expo), Tailwind CSS
Delivery	Docker, GitHub Actions, Codemagic, Vercel, pytest, Vitest, JUnit, Playwright
Languages	Python, TypeScript, JavaScript, Dart, SQL, Java, C++, R

EXPERIENCE

Founding Engineer & Tech Lead, Movigo Innovations Pvt. Ltd., Indore Apr 2026 – present

App Developer (Apr 2026), Lead App Developer (May 2026), Founding Engineer & Tech Lead (Jun 2026)

- Only engineer at a live delivery marketplace: rebuilt the product from scratch after an outsourced team delivered designs but no working software, and own the backend, both mobile apps, the operations console and production support.
- Node.js, Express and MongoDB backend with 400+ API routes, 40 data models, 8 scheduled jobs and a 15-second real-time dispatch loop.
- Made booking acceptance race-safe: one conditional database write lets exactly one of several accepting drivers win a booking.
- Switched dispatch to OSRM road distances with one distance-matrix call per booking instead of one call per driver.
- Shipped Flutter driver and retailer apps to Google Play (1K+ installs each) and the retailer app to the App Store.
- Integrated Razorpay wallets and fees so every payment is verified and credited exactly once; moved live tracking and chat to Pusher without breaking apps already in users' hands.

Internships

- **AI/ML Intern and Python Development Intern (virtual)**, CODEXINTERN Aug 2025
- **Software Development Engineer Intern (part-time, remote)**, Bluestock Fintech May – Jun 2025
- **C and C++ Programming Intern**, TechnoHacks Solutions Pvt. Ltd. Nov – Dec 2024
- **C++ Programming Intern (virtual)**, CodSoft Nov – Dec 2024

Plus 7 further internships in data science, analytics and AI; full list at mokshitsharma27.vercel.app/experience.

PROJECTS

RouteCore Java 17, Maven, JUnit; no runtime dependencies github.com/Mokshitsharma/RouteCore

- Route-optimisation and fleet-scheduling engine with a hand-written hash map, min-heap and k-d tree, Dijkstra, A* and 2-opt.
- k-d tree 408× faster than brute force at 100,000 points (3.92 ms against 1,601.66 ms); A* expands up to 200× fewer nodes; 47 JUnit tests.

Hyperlocal Marketplace Node.js, Express, PostgreSQL, Drizzle, Socket.io, Next.js, TypeScript

- Delivery marketplace with a customer web app, store dashboard and operations API: every order transition is a compare-and-set update, stock is reserved atomically, and in-flight orders are reconciled on restart.
- 52 of 52 backend tests passing, covering the state machine, checkout and payments, dispatch retry and escalation, and restart recovery.

Refera React Native (Expo), React, Express 5, Prisma, PostgreSQL, TypeScript github.com/Mokshitsharma/Banksaathi-clone

- Fintech referral platform: converted leads pay two-tier commissions into an append-only ledger where a database trigger rejects updates and deletes and balances can never go negative.
- Money in integer paise and rates in basis points; row locks make simultaneous withdrawals safe; mobile app, admin panel and API in one typed monorepo with 50 API tests.

SettleAI Next.js, TypeScript, PostgreSQL, Drizzle, MCP, PayPal APIs, Zod, Playwright PayPal AI Hackathon 2026 entry

- Escrow for real-world jobs that AI agents hire people to do: agents scope jobs, judge photo proof and propose dispute splits, and a deterministic guard approves every payout.
- Double-entry ledger in integer cents with idempotency keys; every step becomes a signed, hash-linked receipt that verifies offline in 81 ms.
- 146 unit, integration and end-to-end tests; evaluation shows 0% false releases and every injected or tampered proof detected, and a 50-way concurrency test never overspends.

EDUCATION

Integrated B.Tech + M.Tech, Artificial Intelligence and Data Science, CGPA 8.2 2023 – 2028 (expected)
School of Data Science and Forecasting, Devi Ahilya Vishwavidyalaya, Indore

CERTIFICATIONS

Google Data Analytics Professional Certificate; HackerRank 5-star in Python, SQL and C++; Data Analyst Program, Infosys Springboard; 5-Day AI Agents Intensive, Kaggle and Google (Dec 2025); Generative AI Foundations, Skillsoft (Nov 2025); Generative AI Foundations: IT Integration with Generative AI, Infosys Springboard (Nov 2024); Excel, Infosys Springboard (Nov 2024); AI Masterclass, Freedom of AI (Jan 2024).
